HiredScore   Taleo ·X·

Human Resources Intelligence Partner for Taleo Clients

The HiredScore & Taleo's deep, bi-directional integration enables you to maximize your existing technology investment faster to hire more fairly and efficiently.

Unlock unprecedented screening efficiency

Efficiently prioritize applicants based on their qualifications and the job description is directly within Taleo. HiredScore grades populate instantly upon candidate application, maintaining Taleo as your system of record.

Surface past applicants when they're likely to apply

Instantly Fetch the most relevant talent for every req, with talent-conversion prediction, qualifications verification, and bias-mitigation, increasing your sourcing capacity by 3x.

Leverage fully compliant AI

Combining best-in-class Taleo systems with fully explainable, bias-mitigating HiredScore AI enables the most compliant global companies to progress HR transformations without risk and with legal approval. Highly customized and globally-local HiredScore AI, available in 150 countries, improves local Taleo satisfaction and adoption, reducing local solution add-ons for unique hiring markets (i.e. China & Brazil).

Fully connect & utilize your HR tech stack

HiredScore's Nucleus connected layer improves data flows, work processes, and cross-system automation capabilities for Taleo partners and non-partner systems, data, and actions.

Pre-built, Native HiredScore AI Solutions for Taleo

- **Minimize time & investment in integrating your tech stack**
  Native-for-Taleo, pre-built integrations reduce time to implement, cost of IT ownership, and client effort for coordination with Taleo updates and changes, maximizing AI impact and quality.

- **In-house Taleo integration engineers and implementation consultants**
  Every client is supported by HiredScore's in-house team of Taleo engineer, product, data science, and delivery consultants to ensure a seamless process from kick-off to go-live and post-launch support.

- **Proprietary, automated integration delivery & monitoring platform for easy launch**
  Deep bi-directional, real-time integration allows for seamless delivery process with minimal client work (10-15 hours in total HRIS/IT time from kick-off to launch), easy AI maintenance post-launch, and continual two-way communications and updates to maintain Taleo record quality & updates.
