

Optimize & Augment Your Workday Investment with HiredScore

Achieve your HR Transformation goals with Talent Orchestration solutions that are deeply integrated, fully global, and configured for bias-mitigation and safety

Maximize Your Workday Investments with Smart & Safe Automation

Maximize the full potential of your Workday investments with customizable, fully compliant, global candidate scoring, sourcing automation, internal mobility, diversity recruiting, and total talent intelligence across your modules - Recruiting, HCM, Talent Marketplace, Skills Cloud, and LMS, etc.

Deep & Seamless Integrations Lead to Speed to ROI & Our Highest-Rated HRIS/IT Solutions

Pre-Built Workday Integrations lead to a quick-to-ROI, low-risk to deploy, and high-performing post-launch AI for your Workday solutions. Our **Workday Access Partnership** ensures our integrations are fully up to date, our in-house expert-Workday teams implement and support your needs, our current & future product roadmap maximizes your Workday investment, and HRIS/IT teams have little to no risk for go-live and post-launch maintenance of our fully supported HiredScore-for-Workday AI.

Leverage Fully Compliant & Globally-Localized AI

Combining best-in-class Workday systems with our fully explainable, bias-mitigating HiredScore AI enables the most compliant global companies to progress HR transformations without risk and with legal approval. Our Highly customized and globally-local HiredScore AI, available in 150 countries, improves local Workday satisfaction and adoption, reducing local solution add-ons for unique hiring markets (i.e. China & Brazil), and ensuring global transformation agendas are achieved.

AI that Brings Together Workday With Your Collaboration Layer & Other Third Parties

HiredScore's Nucleus fully connects and comprehends cross-system data, workflow processes, and multi-platform automation capabilities for Workday and your third parties (chat bots, video interview, VMS, CRM, talent databases, etc). Our AI is also integrated with your collaboration layers (MS Teams, Slack, Skype, etc) for minimal change management, improved adoption and utilization, low cost of IT ownership, mitigation of data islands, and advanced HR Innovation program achievement.
